

B2 with a tab 46 which reads "Summary". Other tabs 48 are also visible in Fig. 5 as is the upper edge of the rear cover 50 of the binder. The first heading sheet 51 behind the transparent index sheet with tab 46 has the titles of the section on it; and in this case the title read "Profit Jump". This title may be on clippings secured to the heading sheet; or they may be printed directly on the heading sheet, but are visible through the tabbed binder sheet.

Please amend paragraph 27 to read as follows:

B3 It may also be noted that the rear pocket 52 may be provided with a series of cuts 56 which are intended to retain a business card or other similar sized sheet material. Also, in Fig. 6, the same reference numerals are employed to refer to the same parts in the left and right hand views of Fig. 6.

- B4
1. A semi-flexible cover-view binder assembly, comprising:
 - front and rear semi-flexible plastic covers, said front cover being transparent and being provided with a peripheral coating forming a substantially opaque frame defining an open area within the frame, said covers having inner and outer surfaces;
 - an inner pocket secured to the inner surface of said front cover; said pocket having inner, outer, top and bottom edges; said inner pocket being secured along its outer edge and its bottom edge, and being free and unsecured to the cover at the top and inner edges, thereby permitting quick insertion of visual material from the top and inner edges of said pocket;
 - an insert having visual information applied thereto in the open area within said frame, said insert being in said inner pocket;
 - a plurality of transparent dividers with tabs thereon mounted within said binder;
- and

By ~~sub~~ said rear cover having a partial pocket extending for less than half of the area of said rear cover; said partial pocket being formed of the same sheet as the rear cover, with the pocket being formed by folding a sheet upward and bonding it in place, said rear cover being coated with substantially opaque material similar to the frame coating on the front cover.

Sub ~~5~~ 5. A system including a binder assembly comprising:

a binder assembly comprising:

(a) front and rear semi-flexible plastic covers, said front cover being transparent and being provided with a peripheral coating forming a substantially opaque frame; said covers having inner and outer surfaces;

BS (b) an inner pocket secured to the inner surface of said front cover; said pocket having inner, outer, top and bottom edges; said inner pocket being secured along its outer edge and its bottom edge, and being free and unsecured to the cover at the top and inner edges, thereby permitting quick insertion of visual material from the top and inner edges [areas] of said pocket;

(c) an insert having visual information applied thereto in the area within said frame, said insert being in said inner pocket;

(d) a plurality of transparent dividers with tabs thereon mounted within said binder; and

(e) said rear cover having a partial pocket extending for less than half of the area of said rear cover; said partial pocket being formed of the same sheet as the rear cover, with the pocket being formed by folding a sheet upward and bonding it in place, said rear cover being coated with substantially opaque material similar to the frame coating on the front cover; and

said system further including a computer, a keyboard and a printer, for displaying the framed front cover of said binder and forming visual material within said frame, and printing out the visual insert for insertion into the inner pocket with the visual material set-off and enclosed by said frame.

15. A system including a binder assembly comprising:

a binder assembly comprising:

(a) front and rear semi-flexible plastic covers, said front cover being transparent and being provided with a peripheral coating forming a substantially opaque frame; said covers having inner and outer surfaces;

B7
(b) an inner pocket secured to the inner surface of said front cover; said pocket having inner, outer, top and bottom edges; said inner pocket being secured along its outer edge and its bottom edge, and being free and unsecured to the cover at the top and inner edges, thereby permitting quick insertion of visual material from the top and inner edges [areas] of said pocket;

(c) an insert having visual information applied thereto in the area within said frame, said insert being in said inner pocket;

(d) a plurality of transparent dividers with tabs thereon mounted within said binder; and

(e) said rear cover having a partial pocket extending for less than half of the area of said rear cover; said partial pocket being formed of the same sheet as the rear cover, with the

pocket being formed by folding a sheet upward and bonding it in place, said rear cover being coated with substantially opaque material similar to the frame coating on the front cover; and

87 said system further including a computer, a keyboard and a printer, for displaying the framed front cover of said binder and forming visual material within said frame, and printing out the visual insert for insertion into the inner pocket with the visual material set-off and enclosed by said frame.

Sub CS
D1 17. A semi-flexible cover-view binder assembly, comprising:

front and rear semi-flexible plastic covers, said front cover being transparent and being provided with a peripheral substantially opaque frame defining an open area within the frame; said covers having inner and outer surfaces;

88 an inner pocket secured to the inner surface of said front cover; said pocket having inner, outer, top and bottom edges; said inner pocket being secured along its outer edge and its bottom edge, and being free at the top and inner edges; thereby permitting quick insertion of visual material from the top and inner areas of said pocket;

an insert having visual information applied thereto in the open area within said frame, said insert being in said inner pocket;

a plurality of dividers with tabs thereon mounted within said binder; and

said rear cover having a rear pocket formed of the same sheet as the rear cover.

Sub CS
E6b1 19. A system including a binder assembly comprising:

a binder assembly comprising:

89 (a) front and rear semi-flexible plastic covers, said front cover being transparent and being provided with a peripheral coating forming a substantially opaque frame; said covers having inner and outer surfaces;

(b) an inner pocket secured to the inner surface of said front cover; said pocket having inner, outer, top and bottom edges; said inner pocket being secured along its outer edge

and its bottom edge, and being free and unsecured to the cover at the top and inner edges, thereby permitting quick insertion of visual material from the top and inner edges [areas] of said pocket;

(c) an insert having visual information applied thereto in the area within said frame, said insert being in said inner pocket;

(d) a plurality of transparent dividers with tabs thereon mounted within said binder; and

89 (e) said rear cover having a partial pocket extending for less than half of the area of said rear cover; said partial pocket being formed of the same sheet as the rear cover, with the pocket being formed by folding a sheet upward and bonding it in place, said rear cover being coated with substantially opaque material similar to the frame coating on the front cover; and

said system further including a computer, a keyboard and a printer, for displaying the framed front cover of said binder and forming visual material within said frame, and printing out the visual insert for insertion into the inner pocket with the visual material set-off and enclosed by said frame.

Sub C7
21. A semi-flexible cover-view binder assembly, comprising:

front and rear semi-flexible plastic covers, said front cover being transparent and being provided with a peripheral substantially opaque frame defining an open area within the frame; said covers having inner and outer surfaces;

an inner pocket secured to the inner surface of said front cover; said inner pocket being secured along three edges with the semi-flexible covers of said binder assembly permitting quick insertion of visual material into said pocket; and

an insert having visual information applied thereto in the open area within said frame, said insert being in said inner pocket.

22. A semi-flexible cover-view binder assembly, comprising:

front and rear semi-flexible plastic covers, said front cover being transparent and being provided with a peripheral substantially opaque frame defining an open area within the frame; said covers having inner and outer surfaces;

BIP an inner pocket having four edges secured to the inner surface of said front cover; said inner pocket being secured to the front cover along two edges, and the other two edges being free and unsecured to the front cover, thereby permitting quick insertion of visual material from the other two edges of said pocket; and

an insert having visual information applied thereto in the open area within said frame, said insert being in said inner pocket.

*Sub
81* 24. In combination:

a semi-flexible cover-view binder assembly, comprising:

(a) front and rear semi-flexible plastic covers, said front cover being transparent and being provided with a peripheral substantially opaque frame defining an open area within the frame; said covers having inner and outer surfaces;

(b) an inner pocket secured to the inner surface of said front cover; said pocket having inner, outer, top and bottom edges; said inner pocket being secured along its outer edge and its bottom edge, and being free at the top and inner edges, thereby permitting quick insertion of visual material from the top and inner edges of said pocket;

Btt. (c) an insert having visual information applied thereto in the open area within said frame, said insert being in said inner pocket; and

a computer, a keyboard and a printer, for displaying an image corresponding to the framed front cover of said binder, for forming visual material within the frame, and for printing out the visual insert for insertion into the inner pocket of said binder assembly with the visual material set-off and enclosed by said frame.
